

LEADERSHIP

EdFuel's *Blueprint for Success* initiative aims to address a looming talent deficit in the education field, developing many more highly effective K-12 system leaders capable of managing complex and dynamic organizations. To support the field in strengthening talent pipelines, one element of this initiative is the development of competency maps that articulate the essential competencies (specific skills, knowledge, and relationships) for non-instructional roles in school district/network central offices. These maps will provide the foundation for an aligned, proactive approach to developing non-instructional school district/network leaders.

WHAT THIS MAP IS:

The *Blueprint for Success Leadership Competency Map* shows the essential cross-functional leadership skills necessary to work in school districts/networks. This document, developed in collaboration with leaders of school districts, charter school networks and field experts, represents the key abilities necessary for working in any role, within any function, in school districts/networks.

In addition to this competency map, EdFuel's *Blueprint for Success* includes seven functional competency maps (academics and instruction, advocacy, development, information and data, finance, operations, and talent) to show the knowledge, skills, and relationships necessary to manage school districts/networks. The *Leadership Map* should be viewed alongside each functional map to cover the full set of leadership and function-specific skills required.

ORGANIZATION OF THIS MAP:

The Leadership Map is specifically designed to highlight the critical skills needed across all school district/network roles. Competencies fall within these categories:

 STRATEGIC MANAGEMENT	 EFFECTIVE TEAMING	 SELF-MANAGEMENT
Leading effective organizations to set and deliver goals, make sound decisions, and navigate through complexity to achieve breakthrough results	Leading highly collaborative, talent-focused teams	Leading one's own personal growth through self-awareness and self-development.

This map is built upon certain foundational principles essential for success across all levels throughout the organization. These are:

- *Belief that all students can succeed*
- *Commitment to achieving breakthrough student results*
- *Commitment to uphold the organization's ethics and core values*
- *Commitment to equity, diversity, inclusion*

Each competency is described at four organizational levels. While organizational structures and titles will vary, the table below illustrates the levels:

COMPETENCY MAP LEVEL	SAMPLE JOB TITLES	DESCRIPTION
Individual Contributor	Associate, Analyst	<ul style="list-style-type: none"> • Executes tasks within specific, individual workstreams
Manager	Manager, Coordinator	<ul style="list-style-type: none"> • Leads a team within a department • Oversees projects and daily activities • Typically monitors a project or department budget in addition to team management responsibilities
Senior Manager/Director	Senior Manager/Director	<ul style="list-style-type: none"> • Leads a department or multiple teams across the department • Sets strategic direction for the department and oversees department budgets • Coordinates with other departments to incorporate organizational priorities into planning
Executive/Officer	Executive/Officer	<ul style="list-style-type: none"> • Functional leader of the organization and core member of organization's leadership team • Leads multiple departments or teams • Sets strategy and vision for organization, ensures that organization achieves short and long-term goals, and allocates resources effectively • Ensures alignment across the organization to achieve mission and drive student and school success

DESIGN PRINCIPLES THAT GUIDED DEVELOPMENT OF THE COMPETENCY MAPS:

- **ACTION-ORIENTED:** Competencies are described in action-oriented language to encourage the design of developmental experiences and training approaches that will support individuals' growth in these areas.
- **ADDITIVE:** To avoid repetition, the competency levels build on one another, meaning that there is an expectation that senior level skills are also inclusive of those that precede it.
- **ANCHORED IN THE ENVISIONED FUTURE STATE:** As articulated in EdFuel's *Map the Gap* report, the education field is changing and dynamic; the competencies reflect what will be required of leaders over the next decade to achieve greater impact in this constantly-evolving field.
- **BEST IN CLASS:** Competency descriptions incorporate leading examples from best in class organizations in education reform and the private sector and reflect key findings from *Map the Gap*.
- **CUSTOMIZABLE TO DIFFERENT ORGANIZATIONS' VALUES:** The competencies are intended to be adaptable to each organization based on its own culture and values; therefore, the competency maps will not explicitly state a set of required values or elements of an organizational culture.
- **MODULAR:** The functions and levels within competency maps are not the same as job titles; organizations of various sizes and stages of maturity can group various competencies according to their unique organizational structures and roles.

POTENTIAL AUDIENCES AND USES OF THE COMPETENCY MAP:

The *Leadership Competency Map* is designed to equip school districts/networks and the field level organizations that support them to build and strengthen leadership pipelines. The following is a non-comprehensive set of audiences and potential applications of this map:

- An individual—either within or outside the education field—can reference the map to understand the nature of the work and competencies required for education roles, and as a guide to potential opportunities to better understand and develop such skills
- Departmental leaders could use the map as the basis for a competency-based evaluation system for their staff and for an aligned set of development opportunities to bolster the department's performance
- Districts and charter school network leaders can reference the map to understand potential capacity or capability gaps within their organizations
- Education nonprofit organizations—especially those focused on talent development—can use the maps to tailor their programming and professional development to the specific needs of individual functions, and to the specific needs of individuals as they grow within functions

ACKNOWLEDGMENTS:

The *Leadership Competency Map* was created in partnership with the Bridgespan Group and leaders of school districts, charter school networks, and field experts. We would especially like to thank the following working group members for their participation: Ralph Bland, Chief Executive Officer, New Paradigm for Education; Chaka Booker, Managing Director, The Broad Residency; Akeshia Craven-Howell, Assistant Superintendent, Charlotte-Mecklenburg Schools; Preeta Nayak, Leadership Partner, The Bridgespan Group; Marco Petruzzi, Chief Executive Officer, Green Dot Public Schools; Elliott Whitney, Executive Director, Strategic Leadership and Innovation, Spring Branch Independent School District.

METHODOLOGY AND APPROACH:

There are many excellent resources today that point to different models of leadership. This project draws from the best-in-class thinking on what is needed for 21st century leadership, from best-in-class for-profit models and case studies, as well as from education organizations' ongoing work on leadership development. The overarching categories reflect themes across key sources, although specific language and wording may vary. We also drew on thinking from EdFuel's *Map the Gap* report and Bridgespan's leadership practice.
